

FAST reduces Design Verification time by 90%

- 50-60% of Wireless product development time is spent on Design Verification Testing
- FAST automates Design Verification Testing, drastically reducing this interval while simultaneously improving the quality of your product

What is FAST?

FAST is Benetel's *Fully Automated System Test* platform. It combines the power of TestStand™ and LabVIEW™ with standard test equipment and custom built hardware to uniquely automate product testing. It has been successfully used to efficiently test products to various wireless standards such as GSM, EDGE and UMTS. FAST can easily be adapted to test your product.

What's so hot about FAST?

- Fully automated product testing over temperature, supply voltage, frequency etc.
- Optimized to minimize test sequence execution times
- User friendly and intuitive interface.
- Generates easy to read fully documented results
- Self-calibrating
- Configurable for multiple standards
- Designed for easy interfacing to your product drivers
- Tests and limits are user configurable
- Database for storage & post processing of results
- Already successfully used by major OEMs
